ERTS-1

a. Timber Resource Information System

SR 229

b. IN 053

c. We have not received any ERTS-1 imagery from NASA at this time. The product order calls for shipment to Bureau of Land Management in Portland, Oregon to the Bureau of Land Management co-investigator. Analysis and interpretation have been prevented because of the lack of imagery at the facility. I have received some imagery of the Quinault area by special request to the EROS Data Center at Sioux Falls.

d. The co-investigators have maintained communications since our strategy meeting in Seattle on August 21. Because of the lack of imagery at the Portland facility, we have not had a follow-up meeting in the Northwest. We plan to meet in Portland as soon as we have received the imagery from NASA.

e. No significant scientific results at this time. Category 1b.

f. No publications.

g. We hope to receive word from NASA as to replacing the Warm Springs Reservation with the Colville.

h. We are changing our production order to include bulk digital tapes.

i. No change in descriptor forms prepared at this time.

j. No listing of change in data request forms.

k. No formal request made for data collection platforms at this time.
